

MINDLOGIK

The Business Mapping Professionals

TRAINING OVERVIEW

Enabling You to Work Smarter, Think Creatively, Save Time...Every Day

Mindlogik provides relevant MindManager training in a variety of formats for users of all levels, measurably improving usability and productivity and increasing the return on investment for individual and corporate customers alike.

Users are sure to find a way to get the information they need, when they need it, including training on:

- Core value features
- Best practices
- Using map templates

Practical applications of MindManager include:

- Project & strategic planning
- Knowledge management
- Sales effectiveness

Why Invest in Training for MindManager? Surveys of our users indicate that even our most passionate customers plateau in their learning within three months of implementing MindManager. But users who take Mindjet Training say that they got back up to seven hours a week in productivity.

Why? Because of an increased working knowledge of the MindManager Core Value Features. And they report that the intuitive nature of MindManager increases their retention rate after taking Mindjet Training. When compared to the overall cost, these gains alone more than pay for Mindjet Training.

Turning a small investment into one of your best investments
